TOUCH

FOODSERVICE COLLECTION 2024/25

THE FINISHING TOUCH

Any drink, whether it's a cocktail, wine or beer, is best enjoyed in a glass that enhances its taste, smell and appearance. At ONIS, we truly believe the right glass adds value, as it's the first impression of the drink to your guest. We want the right glass to enrich the flavor and aroma of your drink to make it even more enjoyable. But we also want it to stand out.

Choosing the right glass makes all the difference and is the final step to make the drinking experience perfect. The final effort that elevates this experience from good to great.

All details count when creating that ultimate drinking experience, where the glass is the finishing touch!

BRAND AMBASSADOR

Meet Mihails Minckovskis, also known as Misha, our Global Brand Ambassador. With an extraordinary professional background and lots of experience in the hospitality industry, he soon stood out of the crowd. Misha is based in Latvia but travels with us to all international barshows and events. But also local masterclasses are possible!

He participated in the second edition of our Glassology contest where his 'Nature's Footprint design' took second place. With this experience in his pocket he is a great fit to lead the 3rd edition of the Glassology design contest in 2023!

“When my father, my inspirational mentor, brought me into the industry and gave me all the basics of hospitality, I could not imagine the passion I would gain for such an amazing industry. When I met the ONIS team I immediately felt a great connection with them, and I am a total fan of their glassware. I’ve used ONIS glassware since 2017; I guess 80% of my home glassware is ONIS. After the last interview momentum, I knew this was the team to be part of... and here I am!”

WHERE ARE WE MADE AND BY WHOM

Leerdam Crisal Glass (LC-Glass) has been writing the history of Glass in Europe since the XVIII century. We are proud of our rich roots in the European glass cities of Leerdam, The Netherlands, and Marinha Grande, Portugal. In our open organization in which Northern and Southern Europe come together, we embrace diversity, stimulate and challenge each other to continue to innovate and improve ourselves every day. We take care of each other and the world around us, and are constantly working to make the production process more sustainable, for example by using energy-efficient furnaces and green energy wherever possible.

We have been designing, producing, and selling glassware for 250 years under the brand Royal Leerdam for the consumer and now introducing ONIS, the new iconic brand for professionals. Our glassware can be found everywhere; in many restaurants and bars but also in the cosiest homes worldwide. We dedicate our day-to-day business to those looking for quality and originality.

RECYCLING HAS ALWAYS BEEN AT THE HEART OF OUR BUSINESS!

We aim to produce 100% recyclable glass products with zero impact on the environment, assuring that the next generations can live in a better world. We do this by applying sustainable processes throughout the organization and supporting social, economic, and cultural progress in the communities where we live and work.

GLASS. A CLEAR CHOICE.

WHAT WE ARE PROUD OF:

Our products and boxes are 100% recyclable without loss of quality.

Our glass is 100 % food-safe and it is not harmful to the environment.

We collect and re-use the glass in our factories so that each new glass starts with 20% to 50% of pre-consumer recycled glass.

OPTIMELT furnace installation in our production unit in Holland reduced energy & CO₂ by the glass melting process by up to 45%, with up to 75% less NO_x released to the atmosphere.

In 2021, our Dutch Plant's electric power came 100% from green electricity. Our Portuguese Plant is working towards the utilization of green energy (H₂).

Our Portuguese Plant was awarded a silver medal of Eco-Vadis sustainable rating, observing labor & human rights and the environment. Placing our company among the top 25% of companies assessed by EcoVadis.

We support a sheltered employment organization for people with disabilities.

We celebrate diversity, racial equality and social justice.

We embrace the responsibility of social progress by supporting a broad range of organizations through monetary and in-kind product donations.

We work with a young start-up that gives a second life to used wine bottles, creating sustainable products for the end-consumer. Embracing circular economy.

Of the total waste generated by our Portuguese Plant, 90% is recycled, working closely with national environmental and waste entities to promote recycling

WHAT SETS US APART

The product has an elegant thin yet robust stem. Proof that elegance can go hand in hand with sturdiness.

Glassware designed to bring out maximum aroma and flavor for increased quality perception in serves.

The product has a very fine polished rim for an elegant look & feel and refined drinking experience.

The product is designed to be stacked for space saving purposes.

This special thermal after-process strengthens the upper portion of the glass, the area most vulnerable to breakage. It increases the resistance to thermal and mechanical shock which results in remarkably durable glassware with prolonged service life.

The colour is embedded in the mass of the glass during its production, and not applied by an after-process, and therefore fully resistant to dishwashing and scratching.

This product showcases a larger footplate for extra stability, granting an additional elegance to the piece. It is the perfect balance between form and functionality.

In the ONIS collection, we can find the most iconic glasses, with a timeless and striking design that many know only by the silhouette, such as Hobstar, Flashback and SPKSY.

The Glassology Contest challenges professionals working in the Drinks Industry, to develop and create their ultimate glassware design. As a result of that, some of our product ranges find their roots in this competition, including: The Gats, 1924, the Tulip Punch Bowl and Divergence.

XTRATUFF

ONIS' Xtratuff treatment is a super strengthening thermal after-process for "pressed" tumblers.

The Xtratuff process is only performed on the upper third of the glass, which increases its resistance to thermal and mechanical shock.

By treating this upper portion at a lower temperature than tempering, you put less stress on the glass. This has a positive effect on how the glass breaks and also improves its overall durability.

EMBOSSEMENT

ONIS EUROPE

Proudly produced in Europe, our tumblers hold the distinctive sign of ONIS EUROPE at their bottom. This stamp symbolizes our dedication to design excellence and European quality.

ONIS XTRATUFF

Our XTRATUFF glasses will feature, from now on, the XTRATUFF signature at their bottom. This distinctive detail ensures you can always identify the exceptional super-strengthening thermal after-process applied to the upper part of the “pressed” tumblers.

ONIS FOOTPLATE EMBOSSEMENT

ONIS Footplate Embossment: Discover the signature touch of ONIS logo added to selected stemware, making it distinctly ours. This unique detail reflects our firm commitment to quality and style.

Born from the mastery of Glassology by ONIS, The Gats Stemware showcases geometric lines and luxurious ornaments to the stem.

These glasses, designed together with The Gats Creator Yochen Verbeeck, are more than just a range extension, The Gats Stemware are statement pieces that add value and differ the ONIS glassware collection.

The Glassology Contest challenges professionals from the Drinks Industry to develop an original glassware design that offers the ultimate drinking experience for high-level guests. They are given the opportunity to come-up with a glass shape that elevates a reinvented cocktail or their newest boozy creation.

The winner earns global recognition, as his design is taken into production to be sold by ONIS, all over the world. The cooperation with us continues after the contest, as the winner is named Glassology ambassador in bar shows and cocktail events and will be part of the jury of the next edition.

GLASS HANDLING GUIDE

WHY GLASSWARE BREAKS

Glassware is one of the most important tools used in the hospitality industry. It is also one of the hardest materials around, yet under certain conditions it can also be fragile. The number one reason for glass breakage is improper handling. This guide presents you and your staff with insights into how to minimize breakage through proper handling of your glassware. By applying these tips you can save 20-30% on glassware costs.

THERMAL SHOCK

Glass holds temperature, and a rapid change in temperature can cause enough stress to result in breakage. The main moments when thermal shock loss can occur are in the dishwashing cycle and when preparing drinks. To minimize loss always allow glasses to reach room temperature before and after they are washed and pre heat glasses that will hold warm beverages.

MECHANICAL SHOCK

Mechanical shock in glassware is the direct result of contact with another object, such as a spoon, a beer tap, another glass, or a piece of china. This kind of contact can cause a minute abrasion, invisible to the eye, but a source of weakness in the glass, making it more susceptible to breakage from impact or thermal shock.

Drink Preparation

Use plastic scoops to pour ice.

Never let a glass touch the tap or dispenser.

Re-stock glassware to be prepared for rush periods.

Pre-heat glasses that will hold warm beverages.

Service

Never carry glasses in bouquets.

Bottles should not touch glasses when pouring.

Remove glasses that are no longer in use from the table.

Glasses should not touch each other on trays.

Washing and Cleaning

Wash before first use.

Check the temperature of the dishwasher rinsing and drying cycles.

Remove damaged or abraded glassware from service (damaged glass may break in the dishwasher).

Use the correct rack for the glasses you are washing.

Hold stemware by the stem (not foot) when polishing.

Remove ice from glasses as quickly as possible (to avoid thermal shock).

Check the temperature of the water regularly.

Sort items in bus bins and trays (do not overload them).

Never put cutlery or other objects inside glasses.

Storage

Store glasses in correct compartmentalized racks or boxes.

Only stack glasses which are designed for this.

Glasses in overhead racks should not touch.

Allow glasses time to cool before handling them.

ABOUT OUR PACKAGING

We have implemented eco-friendly packaging solutions, such as recycled cardboard materials and used a reduced number of inks. Designed to be easily recycled after use, reducing waste and conserving resources.
