ORNAMENTAL

Ornamental

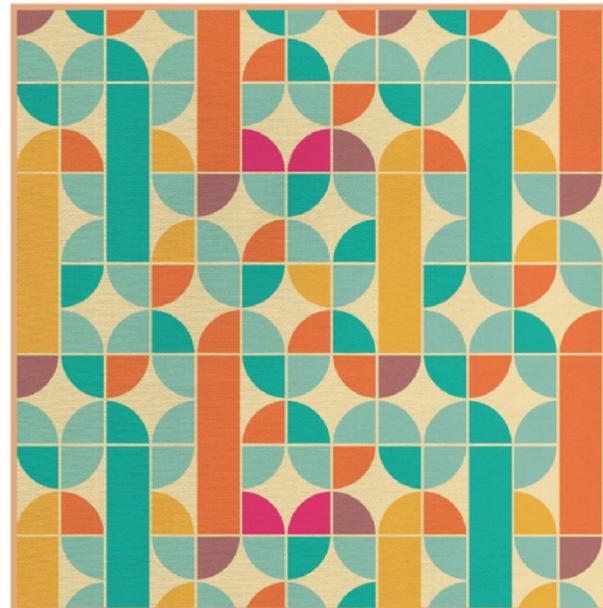

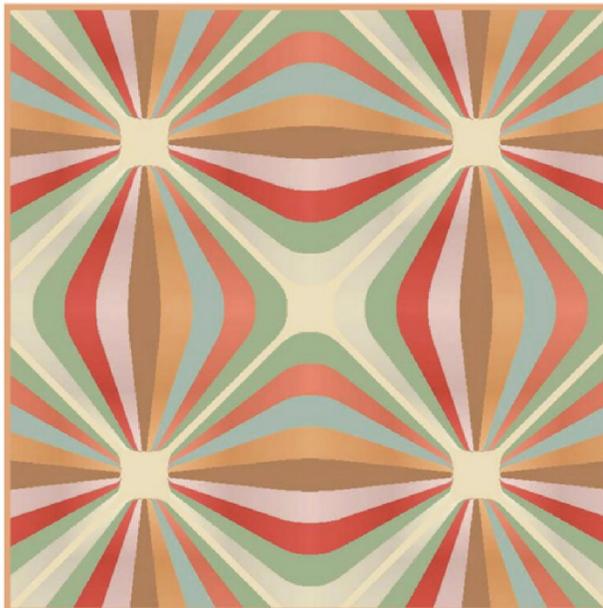

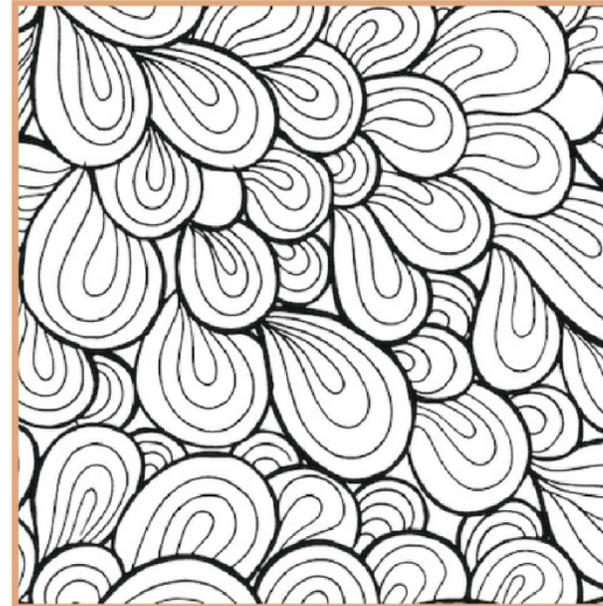

It is an opportunity to experiment and talk about decoration again. Decoration is no longer a crime. The new markets demand more narrative design, mixing heritage and experimentation with forms and materials. The new challenge is to think of forms of decoration that do not result in something excessive. Decoration becomes of two types: tactile decoration and visual decoration. Texture is a real medium that links matter to man, that makes things perceptible. Surfaces become sensitive and communicative because it is through them that the exchange between subject and object takes place, in a sort of interactivity between form and function, where what is perceived is the interface, that is, the communicative surface with which the subject enters into relationship with the object.

SMOOTHNESS

Smoothness

Bevelled edges, sinuous and generous shapes. The new design bon ton favours curves. Goodbye corners and slim lines.

Today's furniture favours full shapes and rounded structures.

A kind of 'domestic revolution' marked by solid furniture with soft lines that reminds the nostalgic of the legendary 1970s.

Accomplice to this new trend is perhaps harmony, sweetness. It is a triumph of soft features, rounded edges and visual continuity.

Avoiding any symmetry, an irregular shape is acquired, as if born from a spontaneous drawing.

Dopo aver lavorato in Francia, negli Stati Uniti e in Giappone, è all'origine di una serie di innovazioni che hanno trasformato la scena culinaria internazionale, tra cui il principio delle verrines, che trasporgano in verticale e in trasparenza i piatti tradizionalmente serviti piatti. Dopo aver vinto numerosi premi e aver lavorato in strutture stellate Michelin (La Table d'Anvers, Patroisiam, ecc.), ha co-fondato ed è diventato capo pasticciere della Pâtisserie des Rives.
